PROFESSIONAL SUMMARY

Civil Engineer with 5+ years of AEC experience across Saudi Arabia and Jordan, spanning road safety, municipal Civil 3D delivery, site engineering, heritage field assessment, and digital workflow automation. Produces technical road-enhancement and pedestrian-safety submissions for Riyadh Municipality and has assessed 300+ school and mosque zones using iRAP SR4S. Combines field-based engineering judgment with multidisciplinary BIM coordination and Python/Selenium automation for high-volume technical data and documentation.

CORE EXPERTISE

Civil 3D Technical Delivery | Road Safety Engineering | iRAP SR4S | Municipal Technical Submissions | Site Engineering | Earthworks & Site Infrastructure | Heritage Field Assessment | BIM Coordination | ISO 19650 Information Management | Model QA/QC | Digital Workflow Automation

TECHNICAL SKILLS

Civil & Infrastructure: Autodesk Civil 3D, AutoCAD, InfraWorks, road and site development drawings, grading workflows, signage and pedestrian safety layouts.

BIM & Coordination: Navisworks Manage, Revit (Architecture & Structure) for coordination, Revizto, Autodesk Construction Cloud (ACC), BIM 360, Autodesk ReCap, clash detection, federated model review, model QA/QC.

Automation & Data: Python, Selenium, pandas, openpyxl, Advanced Microsoft Excel, automated validation, exception handling, and high-volume documentation workflows.

Working Knowledge: Synchro 4D, Primavera P6.

PROFESSIONAL EXPERIENCE

Consolidated Consultants Group for Engineering & Environment (CCG) | Riyadh, Saudi Arabia

Civil Engineer | Sep 2024 - Present

Infrastructure Department | Road Safety, Heritage & Digital Engineering Scope

- Produce Civil 3D technical submission drawings for Riyadh Municipality covering road enhancement layouts, signage schemes, pedestrian safety measures, and site development interventions.
- Assess 300+ school and mosque zones using the iRAP SR4S methodology and translate field findings into coordinated engineering intervention drawings.
- Prepare hardscape, softscape, and public-realm documentation supporting road, pedestrian, and site infrastructure improvement works.
- Conduct field visits and comprehensive existing-condition assessments for heritage assets within the National Residential Heritage Documentation Programme (30,000+ sites), covering on-site study, asset identification, technical documentation, registration, and current-condition evaluation.
- Develop Python/Selenium automation for heritage data and documentation workflows, recording 7.5x-21x the documented manual reference throughput across comparable tasks; one automated workstream processed 5,256 records with validation, exception isolation, and QA/QC checks.

Salaymeh Group Construction Company | Jordan & Saudi Arabia

Site Engineer / Architectural Consultant | Jan 2024 - Jul 2024

- Supervised excavation, manholes, pipe culverts, level control, compaction, structural and block works on residential and infrastructure projects.
- Designed the architectural scheme and coordinated civil/site execution for a 1,700 m² steel-framed date storage facility in Al-Qassim.
- Delivered an interior design package for a Riyadh apartment and supervised a palace landscaping project in Amman and a chalet resort in Ajloun.

RUBA Engineering & Partners | **Amman, Jordan**

Project Team Leader - Security Forces Medical Center Project (MOI-SFMC) | **Jun 2022 - Sep 2023**

Multidisciplinary BIM Coordination Scope | Riyadh & Jeddah, Saudi Arabia

- Coordinated multidisciplinary BIM delivery within a 500,000 m², 1,400-bed healthcare programme spanning architectural, structural, MEP, and low-current interfaces.
- Reviewed federated project information, identified coordination conflicts, supported clash resolution, and maintained structured issue follow-up before submissions.
- Produced coordinated technical BIM documentation linking model information to drawing deliverables and interdisciplinary coordination requirements.

Douar Architects and Engineers | **Amman, Jordan**

Architectural Engineer | **Jan 2021 - Oct 2022**

- Produced Revit/AutoCAD design and supervision drawings for three villas and two residential buildings.

EDUCATION

M.Sc. in Engineering Management - Al-Zaytoonah University of Jordan | Expected 2027 (In Progress)
B.Sc. Civil and Infrastructure Engineering - Al-Zaytoonah University of Jordan
Diploma in Architectural Engineering & Interior Design - Al-Balqa' Applied University

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

BIM Credentials: Certified BIM Coordinator - Niqat (2024) | Certified BIM Planner - Niqat (2024)
Autodesk ATC / Niqat Global: BIM for Consultants - 200h (2024) | BIM Management - 100h (2023) | BIM Implementation - 50h (2024)
ISO 19650 & Information Management: Certified Information Manager Level 2 Advanced Course - Plannerly (2026) | Company Level ISO 19650 Certification Readiness Course - Plannerly (2026)
Road Safety & Collaboration: iRAP SR4S Quality Reviewer Accreditation - Cert. 01601 (2025-2026) | Revizto Collaboration Essentials (2025)
Project Management: Professional Project Management - 36 Training Hours, Arab International Academy (2022)
